

Cross-study estimands by native unit

Separate harmonized seed-level rerun · n = 128 seeds · seed is the independent unit · whiskers are 95% percentile-bootstrap intervals

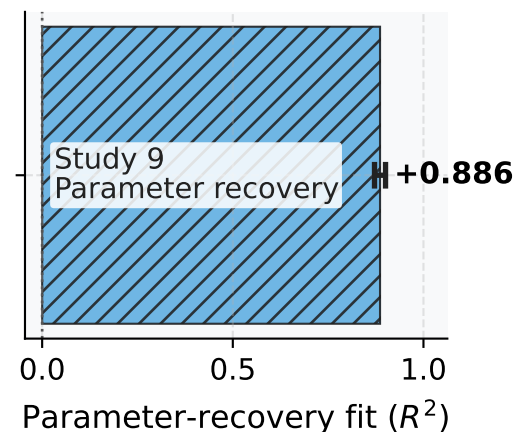

A Signed accuracy contrast (fraction)

B Signed information / free-energy contrast (nats)

C Parameter-recovery fit (R^2 , unitless)

/// positive signed estimand xxx negative signed estimand .. near zero

A spans the left column; B and C occupy the upper and lower right. Direction is metric-specific; no cross-unit ranking.
